Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, drawn to a display device substrate, classified in class 349/158 and 42.
- II. Claims 15-18, drawn to a method of manufacturing a liquid crystal device substrate, classified in class 420.

The inventions of groups II and I are related as a process of making and product made. The inventions are distinct if either or both of the following can be shown:

- (1) that the process as claimed can be used to make other and materially different products or
- (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f))

In the instant case the device of group I can be made by different processes such as sputtering, spin coating etc.

Therefore, the inventions are distinct, each from the other because the product as claimed can be made by another and materially different process.

Further more, because the search required for Group I claims is not required for Group II claims, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

Conclusion

Since an election to the restriction is required, a SHORTENED STATUTORY PERIOD for response to this action is set to expire ONE (1) MONTH or THIRTY (30)

Art Unit: 2871

DAYS, whichever is longer, from the mailing date of this communication. Failure to respond within the period for response will cause the application to become abandoned. (35 U.S.C. §133). Extension of time may be obtained under the provisions of 37 CFR 1.136(a).
